About Beck Prosper

Beck Prosper Limited was established in 2010 when the Beck Industries Group took over Prosper Distribution Limited.

The Prosper association with bolting goes back to 1969 with the establishment of a company specialising in thread rolling equipment in Ayrshire, Scotland. Prosper grew to become a world class manufacturer of studbolts through the development of thread rolling and cutting and further investment in CNC machining in the 1980s allowed the company to supplement its standard bolting range with specialist components.

In 2006 Prosper merged their established manufacturing and technical capabilities with the widely respected distribution and service expertise of the Midsteel Group to form Prosper Distribution Limited. This dynamic combination allowed their customers to experience an unrivalled level of quality and service and ultimately to become part of the Beck Industries Group.
