

Beck Prosper Investing in the Future

EFACS E/8

We are proud to announce that Beck Prosper has recently placed a new order to replace its existing computer system with a state-of-the-art cutting edge ERP system. The order, worth in excess of £150,000, was placed with EFACS E/8 after months of careful consideration and comparison.

EFACS E/8 is a web-based system which allows manufacturers to easily deploy software on a global basis. The latest software package is cloud-based and fully integrated and will enhance Beck Prosper's ability to deliver quality products within a timeframe to meet customer demands. The manufacturing system and planning/ scheduling software will bring much improved transparency and visibility of future workload capacity enabling a full tracking service to completion.

Brian Williams, General Manager, would like to thank the management of EFACS E/8 in getting the project to this point and look forward to working with the team in 2021 during the implementation process.

Finally, Brian Williams would also like to thank the Cooper Turner Beck Group for supporting yet another vital project during difficult times and is a testament to their vision and bodes well for the growth of the group going forward.
